Codebook for State Minor Consent Laws for HIV/STI Services

Prepared by Kimberly Nelson, Kristen Underhill, and the iCARE Team (Inclusive Consent and Access to Resources for Everyone)

State Minor Consent Laws for HIV/STI Services

This longitudinal dataset captures important features of state laws that regulate (1) minors' legal capacity to consent to health care, independently, without the consent of their parents/guardians; (2) minors' legal capacity to consent to several specific categories of care, including human immunodeficiency virus (HIV) prevention/treatment such as pre-exposure prophylaxis (PrEP) and sexually transmitted infection (STI) prevention/treatment; (3) minors' legal right to keep information about their receipt of sexual health-related services confidential from their parents/guardians, including when they use a parent or guardian's insurance to pay for the services they receive; and (4) ages of majority for women and men. The dataset covers laws in effect from inception, as early as January 1, 1849, through December 31, 2021, in all 50 U.S. states and the District of Columbia.

This research was supported by the National Institute of Mental Health, of the National Institutes of Health under Award Number R01MH119892 (PI: Kimberly Nelson). The content is solely the responsibility of the authors.

There are four standard variables in every MonQcle dataset. They are:

JURISDICTION:
This is a dropdown selection in each coding form. It includes the jurisdictions coded in the dataset.

EFFECTIVE DATE:
This date (MM/DD/YYYY) is the most recent effective date of the legal text captured for this place. The effective date represents the date the policy coded was put into effect.

VALID THROUGH DATE:
This date (MM/DD/YYYY) is the last date the policy was in effect as reflected by the legal text captured to code this policy.

An important note about the Statistical data page:
This codebook should be used in conjunction with the statistical data extract that can be downloaded from the dataset homepage by clicking on the Data button. The value labels defined below will correspond with the coded responses you will see on the Statistical Data page. Coding questions that are not answered will show as a period (".") in the Excel cell. Coding questions can be intentionally not answered, such as when a state does not have a law and the coder therefore leaves the remaining coding answers as unanswered.
